SUMMARY

Software Engineer with 4 years of experience designing and building scalable web applications using **Node.js, TypeScript, JavaScript and React**. Experienced in developing secure REST APIs, frontend applications, microservices, automated testing, CI/CD pipelines and cloud-native deployment workflows. Strong focus on software quality through unit and integration testing, performance optimization and clean architecture. Passionate about building reliable, scalable systems and collaborating across global engineering teams to deliver secure, high-quality products.

SKILLS

Languages — Competent

JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

Backend

Node.js, Express.js, REST APIs, GraphQL, Microservices, Sequelize, SQL, software development life cycle, design patterns

Testing

Vitest, Jest, Integration Testing, Testcontainers, TDD

Frontend:

React.js, Redux, Tailwind, CSS, Bootstrap, Responsive Design, Accessibility (WCAG), Semantic HTML

Databases

PostgreSQL, MySQL

Devops

Docker, Helm, GitLab, CI/CD, Jira

PROFESSIONAL EXPERIENCE

Thoughtworks, Full Stack Developer

09/2022 – Present | Bengaluru, India

- Designed and developed full-stack applications using **Node.js, TypeScript and React**, supporting platforms serving **300K+ active users**.
- Built reusable backend APIs and frontend components that reduced feature delivery time by **20%** through improved application architecture.
- Increased automated test coverage from **85% to 97%** by introducing better testing practices with **Vitest**, code refactoring and pair programming.
- Developed responsive user interfaces while collaborating closely with backend engineers, QA and clients to deliver high-quality releases.
- Contributed to CI/CD workflows and engineering best practices to improve development velocity and software quality.

PROJECTS

Government Fitness App, Full Stack Developer

01/2024 – 11/2025

- Developed a scalable public healthcare platform serving **300K+ daily users** using **Node.js, Express.js, React and TypeScript**.
- Designed and implemented REST APIs powering web applications consumed by thousands of users.
- Built responsive frontend interfaces with React while collaborating closely with backend and client teams.
- Improved deployment efficiency by **20%** through Kubernetes and Helm-based deployment automation.
- Achieved **90% integration test coverage** using Testcontainers to improve application reliability.
- Supported a nationwide digital health initiative benefiting **70K+ students**.
- Authored technical documentation and onboarded new engineers, reducing client environment setup time by **30%**.

AI-Powered Legal QA Bot (OpenNyai Mission), Frontend Developer

04/2023 – 11/2023

- Led frontend development using React for an AI-powered legal assistant built by a cross-functional engineering team.
- Integrated OpenAI APIs with backend services to improve contextual accuracy and reduce user correction time by **25%**.
- Collaborated directly with customers to refine requirements and deliver an MVP within **4 weeks**.
- Worked closely with Python backend developers to integrate secure APIs into the application.

Middleware Open Source Mobility Solution, Full Stack Developer

04/2023 – 11/2023

- Developed backend services and frontend applications using **Node.js, Express.js, React and TypeScript** for a greenfield mobility platform.
- Designed and implemented REST APIs compliant with the **ONDC Beckn Protocol**, enabling secure and standardized communication across partner platforms.
- Contributed to scalable application architecture supporting integration between distributed services.
- Established project-wide testing practices achieving **97% unit test coverage** through automated testing.

EDUCATION

B.Tech in Computer Science and Engineering

06/2018 – 06/2022 | Kerala, India

Govt. Model Engineering College, APJ Abdul Kalam Technological University

AWARDS

Grace Hopper Celebrations (GHC) Scholarship

2022

Awarded by [AnitaB.org](https://anita-b.org/) 🌐 for contributions to technology and gender equity.
