Priya Anna James

Full-Stack Engineer — Node.js / TypeScript / React

priyajames.mec@gmail.com | +91 8301840790 | Bengaluru, Karnataka | linkedin.com/in/priya-anna-james | priya-anna-james.com

SUMMARY

Full-stack engineer with 4 years building and scaling web platforms in **Node.js, TypeScript and React**, including a public platform serving **300K+ active users**. I design secure REST APIs and microservices, test at every level, and work end to end, from architecture through CI/CD, with distributed teams at Thoughtworks serving enterprise and public-sector clients.

SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, HTML5
Frontend	React.js, Redux, Tailwind CSS, Semantic HTML
Backend	Node.js, Express.js, REST APIs, GraphQL, Sequelize, SQL
Testing	Vitest, Jest, Playwright, Integration Testing, TDD
Databases	PostgreSQL, MySQL
DevOps	GCP, Docker, GitLab CI/CD
AI Tools	Claude Code, GitHub Copilot (AI-assisted development)

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Sep 2022 – Present

Thoughtworks — Bengaluru, India

- Designed and built scalable full-stack applications with **Node.js**, **TypeScript**, **React** and **REST APIs** for large public-sector and enterprise platforms; built reusable backend **APIs** and **responsive** frontend components that cut feature delivery time by 20%
- Raised automated test coverage from 85% to 97% with **Vitest**, **unit and integration testing**, refactoring and pair programming; contributed to **CI/CD** pipelines and collaborated with backend, QA and clients to ship quality releases

Client Engagements *— delivered as part of the Thoughtworks role above, not separate employers*

Energy Software Platform — Frontend Developer (Client Engagement) | Dec 2025 – Present

- Frontend developer (**React**) in a 5-person team on an energy software platform that orchestrates billions of data points, used at national scale for grid management, billing and customer operations
- Led an epic end to end over 5 sprints and delivered it on time, from client **requirements gathering** and **demos** through release; stepped in on **Node.js** backend work when the team was stretched
- Joined the support rotation: **debugged live issues**, handled **incidents** and fixed numerous production bugs
- Use **Playwright** for end-to-end testing
- Onboarded a new team member, gave a talk on team practices for working more efficiently, and used **Claude Code** in day-to-day development

Government Fitness App — Full-Stack Developer | Jan 2024 – Nov 2025

- Built a scalable **Node.js** backend and dynamic **React** UI for a public web application tracking youth health metrics, supporting a digital health initiative reaching 70K+ students
- Collaborated with the DevOps team on Helm charts, cutting microservice deployment time by 20%
- Onboarded new team members and wrote **technical documentation**, cutting client testing setup time by 30%
- Pioneered an **integration testing** strategy that reached 90% test coverage and resolved 4–6 bugs weekly

AI-Powered Legal QA Bot (OpenNyai Mission) — Frontend Developer | Apr – Nov 2023

- Led **frontend** development in **React** for an **AI-powered** legal assistant built with a cross-functional team
- Integrated **OpenAI APIs** with backend services, cutting user correction time by 25%
- Worked directly with customers to refine requirements and ship an **MVP** within 4 weeks

Middleware Open-Source Mobility Solution — Full-Stack Developer | Dec 2022 – Mar 2023

- Built backend services and frontend applications for a greenfield mobility platform using **Node.js**, **Express.js**, **React** and **TypeScript**
- Implemented **REST APIs** compliant with the **ONDC Beckn Protocol** for secure, standardized partner communication
- Established **unit testing** practices from the first release

EDUCATION

B.Tech in Computer Science and Engineering | Jun 2018 – Jun 2022

Govt. Model Engineering College, APJ Abdul Kalam Technological University — Kerala, India

AWARDS

Grace Hopper Celebrations (GHC) Scholarship — AnitaB.org | 2022
